

The Navigator

Take your professional learning and development to the next level with our FREE* online self-evaluation tool.

THE NAVIGATOR

Cognition's exciting new tool, The Navigator, is a simple and effective self-evaluation tool designed to help schools, kura and Kāhui Ako start their journey towards a successful PLD Journal application.

Mapped to each of the Education Review Office (ERO) indicators, The Navigator provides an easy step-by-step diagnostic tool that identifies areas of strength and weakness in your school.

Not only is this tool easy to use, but you also receive ongoing support from our team of expert Consultants, who work alongside you every step of the way. Once you've finished, they assess your immediate PLD needs in an easy to read report, helping you to transform insights into actions.

THE BENEFITS

When we sat down to create *The Navigator*, we had one question in mind:

- The Navigator's versatility means it can also be used to prepare for upcoming ERO visits, or simply as a means of implementing effective PLD.
- The Navigator produces a comprehensive and easy to read report that identifies your schools areas of strength and areas of need.
- All stakeholders in your school can get involved. The Navigator is specifically designed to be completed by one or more stakeholder groups, e.g. the board of trustees, principal, leadership team, teachers, students, and parents!

* The Navigator is FREE for all Cognition clients. For those unregistered with Cognition, an annual subscription can be purchased for \$1495.
